Summary

Staff Software Engineer with **10 years** of full-stack engineering experience specializing in scaling healthcare software platforms, real-time messaging, and Generative AI applications at the industry-leading organizations of Google and Epic Systems. Proven track record of leading teams across new problem domains, architecting scalable systems, and mentoring team members to deliver an intuitive and delightful user experience.

Professional Experience

Senior Software Engineer

Seattle, WA

GOOGLE

2021 - 2024

- **GenAI Architecture and Real-Time Messaging Systems:** Served as Lead Engineer for Google Cloud's Generative AI and live chat frontend support platform, designing a scalable, reusable solution for real-time interaction flows that improved the resolution speed of customer issues while lowering operating costs.
- **Mentorship:** Mentored junior and mid-level engineers through compassionate, thorough design and code reviews, while also establishing best practices for frontend architecture, testing, and system maintainability.
- **Platform Modernization:** Led a team of engineers through the full-stack design and rollout of Google Cloud's next-generation support platform to deliver a highly-reliable and modernized product.

Software Engineer

Verona, WI

EPIC SYSTEMS

2014 - 2020

- **Adaptive Care Telehealth Architecture:** Lead Architect for the flagship telemedicine product that enabled health systems to pool virtual clinical resources and thus expanded access to high-availability patient care across hospital networks nationwide.
- **Clinical Product Delivery:** Served as Principal Engineer leading the research, full-stack architecture design, and launch of Epic's first dedicated endocrinology clinical module.
- **Scalable Infrastructure:** Designed and deployed generalized, extensible infrastructure for telesitter video vendors, thereby enabling seamless third-party onboarding and significantly reducing integration costs.
- **System Optimization and Developer Experience:** Spearheaded fleet-wide ASP.NET backend performance optimizations using comprehensive profiling. Driver of company-wide developer experience initiatives, including custom hot-reloading and streamlined version control workflows for improved developer velocity.

Technical Skills

Languages

Python · TypeScript · JavaScript · C# · Java · Rust

Frontend

React · Angular · Redux · HTML5/CSS/SCSS · Accessibility

Backend

RESTful APIs · GraphQL · Python · ASP.NET · Microservices

Infrastructure

PostgreSQL · Google Cloud Platform (GCP) · Docker · CI/CD Pipelines

Domain Expertise

Generative AI Integration · Real-Time Messaging · Healthcare · Telehealth

Education

University of Tennessee

Knoxville, TN

B.S. IN COMPUTER SCIENCE

2010 - 2014

Seattle University

Seattle, WA

GRADUATE COURSEWORK IN CLINICAL MENTAL HEALTH COUNSELING

2025 - 2026
